Motive Hiring Team
Software Engineer Role
Motive
Remote – Pakistan

Dear Motive Hiring Team,

I am writing to express my strong interest in the **Software Engineer** role at **Motive**. As a Computer Science undergraduate at FAST-NUCES with demonstrated expertise in C++ programming and hands-on project experience, I am excited about the opportunity to contribute to Motive's mission of transforming physical operations through data-driven technology.

My technical foundation is built on solid experience with object-oriented programming, data structures, and algorithm design. Through projects like my Stock Market Simulation System, I applied advanced OOP concepts including polymorphism, inheritance, and operator overloading to create dynamic applications. Additionally, my C++ Learning Repository, featuring 30+ curated problems per topic with 60+ solutions I developed independently, demonstrates my commitment to continuous learning and strong problem-solving.

What sets me apart is my combination of technical skills and leadership experience. As Marketing Outreach Coordinator for TEDxFAST Peshawar, I successfully expanded the event's digital presence through cross-functional collaboration. Alongside this, my internship at The H.M Solutions managing digital campaigns strengthened my ability to communicate complex ideas to diverse stakeholders—an asset when building user-focused technology.

I am particularly drawn to **Motive** because of its role in powering nearly 100,000 businesses across industries. Your commitment to leveraging AI and real-time data to improve operational efficiency aligns perfectly with my passion for creating scalable, impactful systems. I am eager to contribute to the development of backend platforms and automation tools that reduce manual workloads for customers.

Beyond academics, I actively engage in communities such as IEEE and the Microsoft Learn Student Ambassador program while also volunteering with Alkhidmat Foundation. These experiences sharpened my teamwork and leadership, and my pursuit of opportunities like Google Summer of Code reflects my drive to grow further as an engineer.

I would welcome the opportunity to discuss how my technical expertise, project experience, and passion for impactful technology can contribute to **Motive**'s continued success. Thank you for considering my application.

Sincerely,

Aazan Noor Khuwaja
